LA REINE LIKELY TO RESUME

SUPERINTENDENT KESCEL ON

LA REINE SPECIAL MEETING.

Believed Another Attempt to Get Ore in Mine Will Be Made.

erintendent Kescel Talks of the

Mine-Mill to Start June 1.

sheba will make a very rich filme, work as been rather slow during the winter because it was impossible to get the compressor plant in commission. That is now in commission, however, though men to handle the drills are a scarce article at camp. As soon as we get the bld workings drained i feel confident that we shall have lots of very fine ore exposed that will bring anywhere from 880 to over \$1,000 per ton. Considerable of this character of rock is exposed above the water level, though it occurs in stringers and feeders which indicate the main hodies have been mined down to the water level."

The last of the material for the mill arrived on the ground the day Mr. Kescel left camp, and he calculates that by the tirst of the coming menth he will be able to place the plant in commission. He says the mill will handly treat fifty tons of ore per day, and he says there is enough ore that will average better than \$20 per ton to keep it going indefinitely. With the mill grinding out anywhere from \$750 to \$1,000 per day in the form of high-grade concentrates, the development of the company's magnificent property will become a very simple and rapid problem to solve. That good headway has been made, all things considered, Mr. Kescel acknowledges, but he promises at together different results by the end of

TONOPAH'S GREATEST STRIKE. Ledge Over Forty-five Feet Thick and \$800 Ore in the Face.

ne following from last Saturday's To ah Bonanza shows that the famou ada camp is beginning to whoo opah Bonanza shows that the ramous levada camp is beginning to whoop hings up:

"For the past week strikes in the nearly properties have occurred daily. Every serson in Totopah has been congratulating one another upon this and that strike, and the cry has been. What's the matter with Tonopah mines? and the inswer came quickly. They are hummers and the like the world has never produced. A Bonanza reporter inspected the Belmont ledge today and by actual measurement finds the crosscut in the ledge to be 45% feet, in almost solid ledge matter. The face has opened up a body of ore that is the richest ever found in the camp. The ore in the face will undoubtedly average \$500 per ton, and from all indications will open into a larger body. The reader must stop and think of the enormous size of this ledge as far as penetrated—forty-five and one-half feet, and no hanging wall in sight. Today it can be conservatively estimated that there are over \$10,000,000 in sight in the Belmont. The east drift in the ledge is in twenty feet and today the face shows ore that will mill \$50 per ton. Tonopah is wild today over the great body of ore, \$3.50 is offered for the stock on the curb, but holders will not dispose of their valuable stock."

INVESTIGATING THE MINES.

Boston Exchange Member Sizing Up

Utah Securities. H. M. Stonemetz, a member of the Bostot mining exchange and of the firm of Bowen & Co., stock brokers, is taking a round-up of the principal mines of the state. Monday he was at the Daly-West,
